Aluminium footing

D3 & D4
Black plastic footing

E
Ergosit seat cushion

S2
Small seat (500W x 460D)

SLIDE SEAT INSTRUCTIONS

The Slide Seat mechanism allows the seat to slide forward increasing the seat depth by 50mm. It offers 5 locking positions.

As depth between the back and seat increases it allows larger people more comfort.

To operate simply lift the handle and slide the seat forward or backward to adjust into a one of the 5 locking positions. The mechanism should find each locking position without any force necessary.
