

TASK RANGE

NORSE 2013

"Integrating creativity and modern aesthetics"

NORSE

NS26B1

The Norse range offers the versatile outstanding value for money without compromising Sturdy Framac's high standard of quality, features and after sales service.

Norse offers all the functionality to suit a variety of workstation applications and while it is positioned as an entry level chair, the Norse's sweeping moulded back lifts it to a new level of style in the more affordable end of the market.

If you are looking for an economically priced seating solution for your office and do not want to compromise on ergonomics, quality and style, you will find it hard to top the Norse range.

Norse chairs are available in medium and high backs, tilt and non tilt seat, with or without armrests. Except for fixed height models, all are fitted with gas lift and back height adjustment.

Options also include 3 paddle mechanisms, ratchet back height adjustment and slide seat

Approved Supplier
SCCB Contract No. 1006
20/10/2009 - 8/02/2013

L6

Not all models have AFRDI certification. AFRDI certificates for select models available upon request.

 NS26 3 paddle mech

DRAFTING

NS20D3 non tilt seat
 NS26D3 3 paddle mech

SLIDE SEAT INSTRUCTIONS

The Slide Seat mechanism allows the seat to slide forward increasing the seat depth by 50mm. It offers 5 locking positions.

As depth between the back and seat increases it allows larger people more comfort.

To operate simply lift the handle and slide the seat forward or backward to adjust into a one of the 5 locking positions. The mechanism should find each locking position without any force necessary.

Sturdy Framac pursue a policy of continuous improvement and reserve the right to introduce modification when required and to withdraw models without previous notification.
