Options	
Option codes must be placed in alphabetical order after chair code.	
A14	Standard loop armrests
B1	Polished aluminium base
B5	Flat magnum base
CHR	Chrome frame (cantilever only)
SS	Slide seat

This chair is the ultimate in comfort, as it combines total seating comfort with superior ergonomics and functional requirements. The Acclaim has been designed to give additional lumbar and kidney support.

Fitted with a synchronised mechanism, which has a 1:2 ratio (for every 1 degree of seat tilt, the back tilts two degrees). Synchronised mechanisms are considered the most advanced as they mimic the ergonomic movement and posture of the human form.

There are two levers which are rotated upwards to activate the chair. One adjusts seat height, the other adjusts seat and backrest angle together, as angles can not be set independently. Rotating the backrest locking lever upwards will release the backrest and seat. Rotate back to original position (downwards) to lock. The chair can be locked in any position or left in the free-float mode.

When left in the free-float mode, the chair back and seat will follow (float-with) the user when they lean forward or backwards in the chair, giving them ergonomic support as they move.

Available in Executive, fixed height and cantilever. Medium and high back. Optimal slide seat is also available.

Acclaim medium back, standard loop arms, polished base

Acclaim medium back, cantilever, standard loop arms, chrome frame

Description

- Acclaim medium back, cantilever
- Acclaim medium back
- Acclaim medium back, fixed height
- Acclaim high back
