The Jimmy has been thoughtfully designed for modern commercial environments where durability, comfort, and contemporary style are essential. Created to suit a variety of interior settings, it offers a balanced combination of functionality and visual appeal. This makes it an excellent choice for visitor areas, meeting rooms, educational spaces, and general seating applications.

Constructed with a reinforced polypropylene shell containing 15% glass fibre, the Jimmy provides impressive strength and dependable long-term performance. Its streamlined sled-base frame delivers a clean, architectural look that complements today's workplace interiors, with a powder-coated frame available in either black or chrome finishes.

Built for commercial use, the Jimmy supports users up to 135kg, offering a reliable seating solution that blends durability, comfort, and modern design for professional environments.
