

Raptor Bariatric Chair

Raptor

Designed for strength, support, and long-term comfort, the Raptor Bariatric Chair is engineered to meet the demands of intensive commercial use. With a Safe Working Load of 200 kg, this chair combines premium ergonomics with heavy-duty construction, making it ideal for corporate environments, control rooms, healthcare settings, and high-use workstations. Built with a robust aluminium 5-star base and fitted with brake castors, the Raptor ensures stability at all times. Users can choose between soft-tyred castors for hard floors or hard-tyred castors for carpeted areas. Its moulded seat and back foam provide excellent cushioning and support throughout the day.

The Raptor range offers an extensive selection of ergonomic adjustability features, allowing each user to customise their seating position for maximum comfort. This includes lumbar support adjustment, a seat slider, weight tension control, independent seat and back angle adjustment, and the option to include an adjustable headrest. The chair also comes standard with fully adjustable arms to support proper upper-body posture. Finished in premium black leather, the Raptor delivers a sleek, professional look suitable for any workplace. It is AFRDI Level 6 tested, ensuring durability, reliability, and top-tier performance in demanding environments. Suitable for indoor use only.

Product Dimensions: (1290 - 1380 mm) L * 540 mm W * 460 mm D
