

# Balance

## Balance

The **Balance** Range is a practical and supportive seating solution developed for aged care, healthcare, and indoor communal spaces. With an adjustable height mechanism, stable four-leg base, and durable upholstered shell, it provides comfort and safety without compromising on clean, modern design. Engineered for daily use, the Balance chair delivers reliable performance, ease of movement, and long-term durability in demanding environments.

### Features

- Bariatric-rated for enhanced strength and stability
- Height-adjustable seat to support safe seating and transfers
- Fully upholstered seat and back for comfort and pressure support
- Moulded foam seat and back for long-lasting shape retention
- Polyurethane arm pads for durability, hygiene, and grip
- Adjustable feet for improved floor contact and stability
- Suitable for aged care and hospital environments
- Indoor use only

A stable four-leg design with adjustable feet helps maintain constant contact with the floor, reducing movement and enhancing user confidence. The height-adjustment mechanism allows carers to set the chair to the appropriate height while the user is seated, supporting safer positioning and mobility.

**Available in low back and high back options. All of the options can be seen above.**

**Compatible with a wide range of local upholstery fabrics. Contact our team at Sturdy Framac for further details.**
